

**BRANCH society** - An interdisciplinary forum for dendrimers, dendrons and branched polymers to fight global challenges

***Aims:***

- To promote the development of the branched polymers science, technology and applications
- To engage active young scientists into the field
- To help establishing horizontal links across different disciplines
- To exchange opinions and get new ideas
- To disseminate knowledge among global audience

**BRANCH** society is to unite young and experienced scientists across organic, inorganic and physical chemistry, biochemistry and molecular biology, materials and biomaterials science, nano(bio)technology and more.

Coming soon – March 2020
